CONTENTS

Giuseppina Anatriello and Giovanni Vincenzi
On H-Jacobsthal and H-Jacobsthal-Lucas sequences, and related quaternions ........................................... ...

Dorin Andrica and Ovidiu Bagdasar
A new formula for the coefficients of Gaussian polynomials ............

Igoris Belovas
An inequality for the Selberg zeta-function, associated to the compact Riemann surface ...........................................

S. Bilal, O. Carja, T. Donchev, N. Javaid, A. I. Lazu
Relaxation of nonlocal m-dissipative differential inclusions ........

D. Deepthy and Joseph Varghese Kureethara
On $L(2;1)$-Edge coloring number of regular grids .................... ...

Ylmaz Durgun and Ayse Cobankaya
Proper classes generated by closed submodules ...........................

Shyamal Kumar Hui, Daniel Breaz and Pradip Mandal
f-biharmonic and bi-f-harmonic submanifolds of generalized $(k;\ldots)$-space-forms ...................................................

Zahid Iqbal and Muhammad Ishaq,
Depth and Stanley depth of the edge ideals of the powers of paths and cycles .........................................................

Erdal Karapinar, Ravi P. Agarwal
Interpolative Rus-Reich-Ciric type contractions via simulation functions .................................................................

Duangkamon Kitkuan, Poom Kumam, Vasile Berinde and Anantachai Padcharoen
Adaptive algorithm for solving the SCFPP of demicontractive operators without a priori knowledge of operator norms ...........

Bartłomiej Kluczynski
On the existence and uniqueness of solution to Volterra equation on a time scale ..............................................................

Donal O’Regan
Leray-Schauder alternatives for maps satisfying countable compactness conditions ......................................................... ...

Fazlollah Soleymani, Ali Akgul, Esra Karatas Akgul
On an improved computational solution for the 3D HCIR PDE in finance .................................................................

Venkatesh Usha, Dumitru Baleanu and Mani Mallika Arjunan
Existence results for an impulsive neutral integro-differential equations in Banach spaces ...........................................

Juntao Wang, Yanhong She, Ting Qian
Study of MV-algebras via derivations .........................................
