SUMMARY

A.R. Haghighi, N. Asghary, A. Sedghi – A subclass of harmonic univalent functions .................................................. 1

A. Khani – Adomian-Tau operational method for solving non-linear Fredholm integro-differential equations with Pade approximant ............................................. 11

A. Shokri, A.A. Shokri – The hybrid Obrechkoff BDF methods for the numerical solution of first order initial value problems ............................................. 23

M.K. Aouf, S. Bulut – Inclusion and neighborhood properties of certain classes of multivalently analytic functions defined by using a differential operator .... 35

A. Caksu Guler, S. Sahan – Unification of $\pi$-generalized closed sets by hereditary classes in generalized topological spaces ............................................. 45

O.T. Mewomo and S.M. Maepa – On character amenability of Beurling and second dual algebras ................................................................. 67

C.S. Bagewadi, G. Ingalahalli – A study on curvature tensor of a generalized Sasakian space form ................................................................. 81

C.R. Premalatha, H.G. Nagaraja – Recurrent generalized $(k, \mu)$ space forms . 95

T. Rosy and S. Sunil Varma – On a subclass of meromorphic function with fixed second coefficient ................................................................. 109

C. Carpintero, E. Rosas and M. Salas Brown – Characterization of generalized $\gamma$-closed sets ................................................................. 119

H. Mao – Object oriented concept lattices constrained by hierarchically ordered attributes ................................................................. 131

U.C. De, K. De – On $\eta$-Einstein LP-Sasakian manifolds ......................... 143

A. G. Alamously and M. Darus – Coefficient bounds for new subclasses of bi-univalent functions using Hadamard product ....................................... 153

M. Sajjadian – The shock profile wave propagation of Kuramoto-Sivashinsky equation and solitonic solutions of generalized Kuramoto-Sivashinsky equation .163

N. Gowrisankar, N. Rajesh – Properties of $b-\theta$-compact spaces ............ 177

S.H. Rasouli – On a class of singular elliptic system with combined nonlinear effects ................................................................. 187
