SUMMARY

A. Al-Omari – Some operators in ideal topological spaces via cozero sets ...... 1
H. S. Abdel Aziz and Adel H. Sorour – On the Laplace operator of a tube surface in Euclidean space ........................................... 13
B. Daraby – A convolution type inequality for pseudo-integrals .............27
F. Hassani and B. Jalali – Z-filter regular sequence and generalized local coho-
mology ................................................................. 37
O. Engel – On the composition of two starlike functions ..................... 47
M. Budden, J. Hiller, A. Rapp – Hypergraph Ramsey Numbers Involving Paths ............................................................... 75
N.U. Khan, S.W. Khan, M. Ghayasuddin – Some new results associated with the Bessel-Struve kernel function .............................................. 89
R. Shamoyan – Extremal problems in BMOA type spaces in domains in \( C^n \) 103
V. Pescar – On an integral operator ........................................... 119
R. M. El-Ashwah – Starlikeness and Convexity of Order \( \alpha \) and Type \( \beta \) for \( p \)-Valent Hypergeometric Functions ................................................................. 127
A. Birlutiu, A. Maier – A Review on Transfer Learning in Medical Imaging 139
