M. Ghayasuddin, N.U. Khan – Remarks on Extended Gauss Hypergeometric Functions .................................................................1
V. Pescar – Certain properties of an integral operator ....................... 15
B. Daraby, A. Shafilo, A. Rahimi – Carlson type inequality for Choquet-like expectation .......................................................... 23
A. Firouzjai, G.A. Afrouzi, S. Talebi – On the Existence of positive solutions for a class of singular nonlinear semipositione systems ....................... 37
Firdous A. Shah – On the composition of two starlike functions ............ 47
C. Selvaraj, K.R. Karthikeyan, S. Lakshmi – Certain Subclass Of Bessel funtions with respect to $(j, k)$–symmetric points ..................................67
R.M. El-Ashwah, E.E. Ali – A Class of Complex-Valued Harmonic Functions Defined by Extended Multiplier Dizok-Srivastava Operator ...................... 79
Q. Din, M.A. Khan – Neimark-Sacker bifurcation and chaos control in a modified Nicholson-Bailey model .................................................... 93
S. Shokooh, G.A. Afrouzi, S. Heidarkhani – Multiple solutions for $p(x)$-Laplacian-like problems with Neumann condition ....................................111
D. Breaz, C.I. Tanase – Univalence Criteria for Integral Operators on the Bessel and Struve Class of Functions ............................................129
