SUMMARY

F.M. Sakar, S.M. Aydo˘gan – Coefficient bounds for certain subclasses of M-fold symmetric bi-univalent functions defined by convolution ............................................ 11
W.A. Khan, M. Ghayasuddin, B.M. Singh – Euler type integral operator involving generalized Mittag-Leffler function ............................................................. 23
V. Popa, A.-M. Patriciu– Other fixed point theorems for two pairs of absorbing mappings satisfying an implicit relation in partial metric spaces .................. 35
S.M. Atshan, A.A. Hamoud – Approximate solutions of fourth-order fractional integro-differential equations ................................................................. 49
R. Abo-Zeid – On a third order difference equation ................................. 89
D.L. Suthar, S.D. Purohit, K.S. Nisar – Certain integrals associated with generalized hypergeometric functions ...................................................... 105
A.O. Mostafa, G. M. El-Hawsh – Subordination Results for Classes of Multivalent Non-Bazilevic Analytic Functions Defined by Linear Operator ............ 113
D. Breaz, N. Breaz, S. Owa – Some properties for certain analytic functions 127
