MONITORING AND ANNUAL ASSESSMENT OF THE RESEARCH PLAN

As of the year after its acceptance, the Academic Committee will assess the progress of the research plan and the research log on an annual basis. Reasons for the assessment results will be given, and the doctoral student, thesis supervisor(s), tutor (when applicable) and director of the Doctoral School will be informed. If the results are satisfactory, the doctoral students will be informed by email or telephone.

Students must obtain satisfactory results to remain on the doctoral programme. If performance is considered unsatisfactory, the doctoral student will draw up a new research plan and submit this to the Academic Committee within six months from receiving the assessment results. If the Academic Committee does not approve the new research plan, the doctoral student must withdraw from the doctoral programme.

The deadline for submitting applications for monitoring and annual assessment of the research plan is 1 July.

The application for monitoring and assessment should be sent to the following email address: sec-matematiques@ub.edu or handed in at the Secretary’s Office for Students and Teaching Staff at the Faculty of Mathematics.
